
What's New in PRINCE2[®] Project Management (Version 7)?

Evolving from a rigid framework to a highly flexible, human-centric methodology for the digital era.

Problem

32% of budget lost when projects fail to reach goals.

39% of projects fail due to changing organizational priorities.

2.3M new project professionals needed annually by 2030.

Tectonic Shifts

Digital Revolution

Agile Dominance

Global Volatility

**The Catalyst
for Version 7**

Project management must evolve. We didn't just add material to PRINCE2—we transformed it to be fit for the future, preserving its integrity while meeting new demands.

More Human

People are now integrated into the core of the method, not treated as a bolt-on.

More Sustainable

Sustainability added as a dedicated 7th aspect of project performance.

More Innovative

New frameworks for embracing Digital and Data Management.

More Flexible

Reduced rules and streamlined chapters; fully tailorable through scenario-based learning.

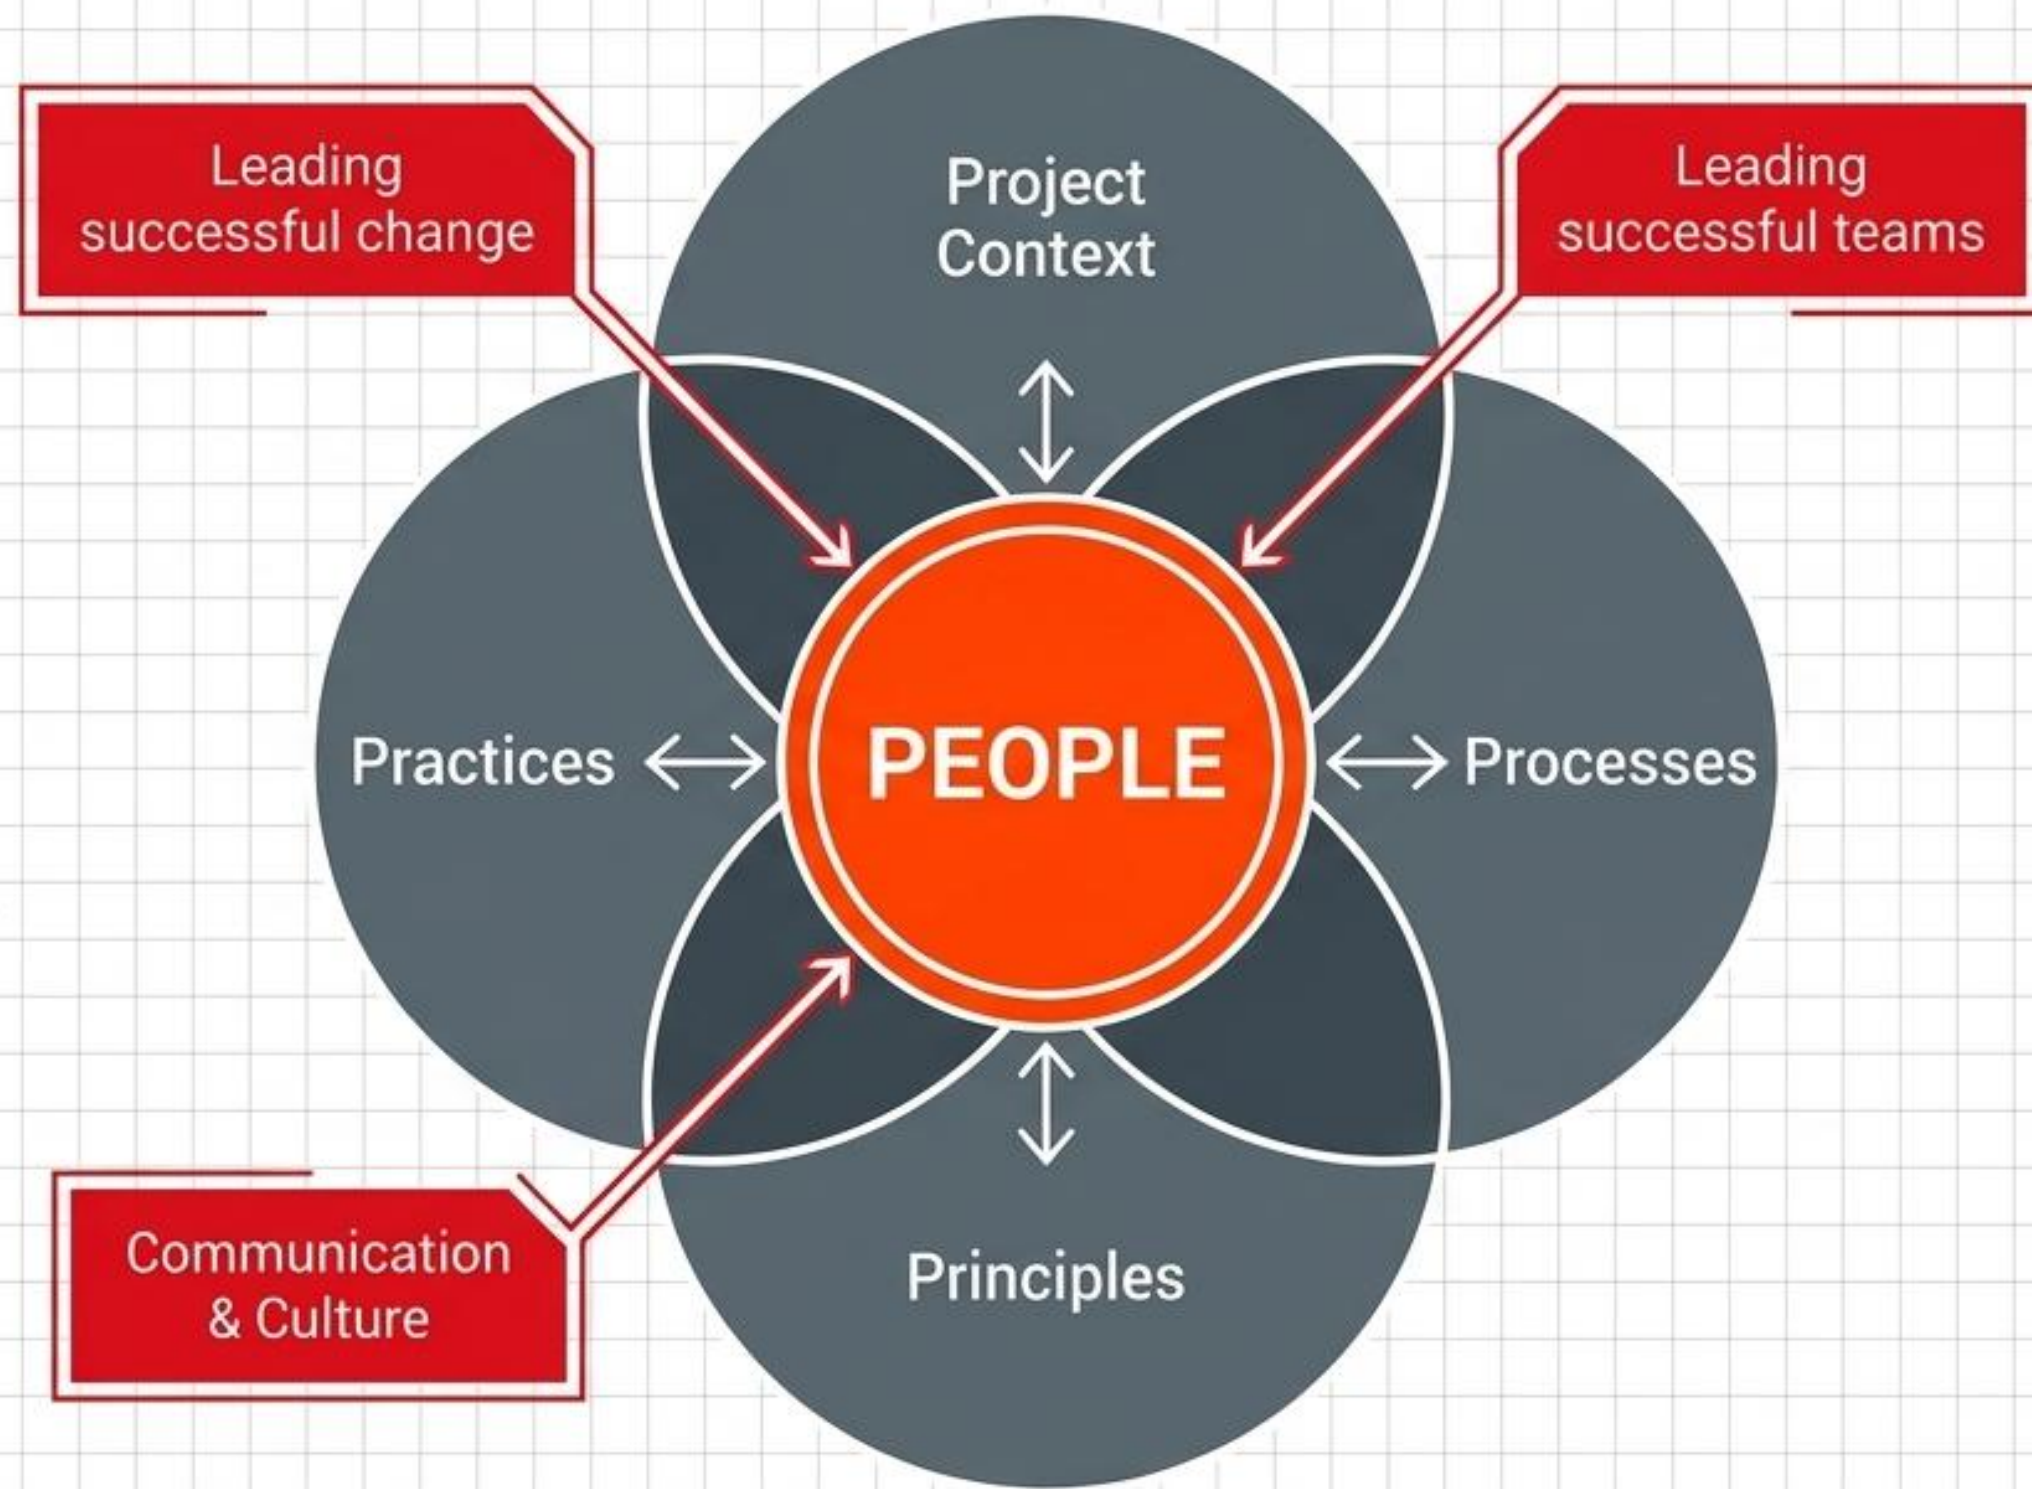

More Inclusive

Simplified, accessible language designed for PRINCE2 for all, widening the addressable market.

More Compatible

Seamlessly integrates with Agile, Lean, and ITIL methodologies.

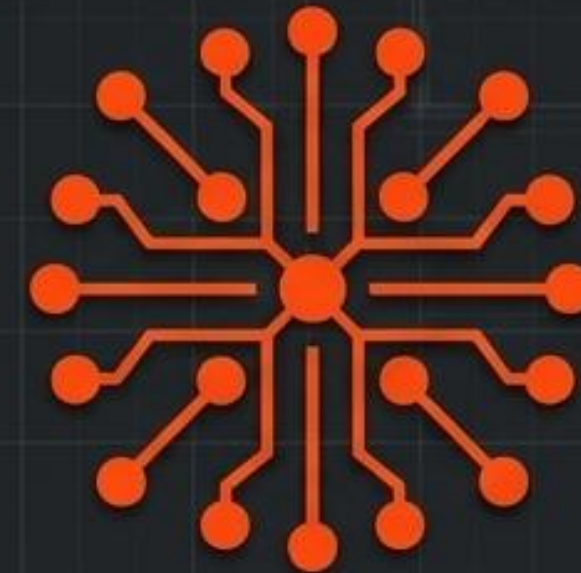

Successful projects need people. The new People chapter is the largest single addition to PRINCE2, proving people are not a 'bolt-on' to project management—they are the central engine.

Sustainability Matters (The 7th Aspect)

Sustainability is now a core performance target and control. Projects must align with environmental and social responsibility goals from selection through product delivery.

Embracing Digital & Data

Data analytics and digital technology now pervade the method. Project managers are equipped to ask: What data does the project need? What will it generate? What happens to it when finished?

Compatibility Chassis

The 7-7-7 Roadmap

7 Principles

The guiding obligations (e.g., ensure continued business justification).

7 Practices

Aspects addressed throughout (formerly called themes).

7 Processes

The step-by-step lifecycle from pre-project to closure.

Tailoring is addressed throughout the entire method. Rules have been reduced to showcase true value across all sectors without the administrative bloat.

Value for the Organization

- ✓ Provides a common language across all departments.
- ✓ Reduces waste and project overspend.
- ✓ Establishes clear roles, accountability, and governance.
- ✓ Supports cross-organizational collaboration and compliance.

Value for the Professional

- ✓ Globally recognized (1,000,000+ certified professionals in 150+ countries).
- ✓ Provides clear, tailorable 'how-to' steps for everyday project managers.
- ✓ Equips professionals to handle modern variables (Data, Sustainability).
- ✓ Builds confidence to deliver success regardless of scale, geography, or culture.
